

Welcome message from the CMPC 2009 Chairs:

The Connectivity, Mobility and Patient's Comfort (CMPC) workshop welcomes you to participate, contribute and exchange experiences with your scientific colleague in the field of Pervasive Computing Technology for Healthcare applications.

The CMPC workshop is the second international workshop organized in conjunction with 3rd International Conference on Pervasive Computing Technologies for Healthcare 2009. The aim of this workshop is to bring together all scientists and international players from the globe, who works on CMPC aspects helping elderly and patients to be treated and/or after cared safely at own home.

The workshop will discuss scientific knowledge related to healthcare technologies from two different but complementary point of view; Biomedical Engineering & Medical Information Technology, and Medical implementation in healthcare environments, including hospital, clinic, nursing home, private home with focus on patient's compliance and satisfaction. The CMPC will also present and discusses issues related to developments, applications and business in this field.
